

for a living planet®

otter certificate

for: **SOTAX**

SOTAX made a donation in your name retaining the habitats of threatened animals and plants.

Over 90 per cent of all rivers and innumerable brooks in Switzerland are blocked. Alluvial forest gives it hardly more. Floods, dryness's and kind dying are the catastrophic results.

We supported world-wide the protection and the renaturation of brooks, rivers

and humid areas. These biotopes secure like the otter and the beaver the basis, which they need for surviving for endangered animals.

This otter certificate is an important contribution to secure precious water for humans and animal.

Thank you!
