OF Systems

announce the organization of
The Sixth Edition of
The International Conference
“From Science to Guidance and Practice”
Online Event

21st - 22nd October 2021,
Bucharest, Romania

It has been long since we have had the chance to gather and discuss the latest developments in pharmaceutical sciences, in vitro dissolution and drug release methodologies, compendial chapters, analytical approaches and the design of dosage forms. Even though we wished to be able to organize our annual meeting with physical presence, the organizing committee has decided that it is safer and more feasible to meet online.

As always, we did our best to obtain the confirmation of highly respected scientists to contribute to this year's edition. It is our hope that, despite the difficulties and limitations of online meetings, we will manage to take full advantage of this opportunity to get together and debate on hot topics in the field of drugs and drug products, continuing our five years tradition of relating and correlating science with regulatory guidance and pharmaceutical practice.

Dr. Vinod P. Shah and Prof. Jean Michel Cardot are our honorable chairmen. The speakers and the titles of their presentations are to be confirmed in the following days. Meanwhile, we kindly ask you to register using the dedicated web page / enclosed formulary. A confirmation on your intention to participate is needed as soon as possible, so that we can adequately establish the online platform.

Looking forward to receiving your confirmation,
Our best wishes to you, your family and colleagues,
Keep safe,
The organizing committee.

The conference has been credited by the College of Pharmacists in Romania with 16 EFC Credits
